APERTURE

The Acquisition Blueprint

CHEAT SHEET · YOUR SYSTEM BUILD ORDER

aperture.com

PHASE 1 — Foundation

Define What You Sell & Who It's For

- [ ] **Audit Your Current Position**
  Review what's working, what's broken, and where your biggest revenue gap is. This is your starting point — not assumptions.
- [ ] **Define Your Ideal Client**
  Name the specific business owner or decision-maker your system is built for. Industry, size, challenge, and what they've already tried.
- [ ] **Value Proposition Framework**
  Articulate what you do, who you do it for, what outcome you produce, and why your approach is different. The foundation every asset is built from.
- [ ] **Offer Architecture**
  Map your core offer — what it includes, how it's delivered, what the client experiences at each stage, and what success looks like.
- [ ] **Delivery & Pricing Model**
  Define your engagement structure — retainer, project, productized service — and price it against the value you produce, not the hours you work.

PHASE 2 — Acquisition Engine

How You Attract & Capture Demand

- [ ] **Lead Asset**
  Build one high-value resource — guide, audit, framework, scorecard — that solves a specific problem for your ideal client and earns their contact information.
- [ ] **Message Architecture**
  Map the core copy blocks that appear across every marketing asset: the problem, the stakes, your mechanism, social proof, and the call to action.
- [ ] **Trust Sequence**
  Build the automated email or content sequence that runs after a lead opts in. Establishes credibility and moves prospects toward the conversion event.
- [ ] **Channel Strategy**
  Choose the one or two channels where your ideal client already pays attention. LinkedIn, email, referral, SEO, paid. Go deep on fewer rather than thin on many.

PHASE 3 — Conversion System

How You Close the Sale

SELECT YOUR CONVERSION MECHANISM

TRACK A — GROUP CONVERSION

Conversion Event — Group Format

Webinar, workshop, or live training. Best for mid-ticket offers at volume.

TRACK B — DIRECT CONVERSION

Conversion Event — Direct Format

Short video or written VSL that qualifies prospects for a strategy call.

- [ ] **Inbound Conversion System (High-Ticket Only)**
  Script your discovery or strategy call. Define the qualification criteria, the session structure, and the close. Remove selling — replace it with diagnosis.

PHASE 4 — Launch & Scale

Go Live, Measure, and Compound

Activate your Trust Sequence first, then launch into the track that matches your offer model and target client. Do not skip the sequence.

TRACK A — VOLUME GROWTH

Group Conversion Track

Best for mid-ticket offers, productized services, or any business growing through volume and high individual client size.

- [ ] Build your opt-in page and connect it to your Lead Asset.
- [ ] Drive traffic to the opt-in through your chosen channel.
- [ ] Deliver your Conversion Event — live or recorded.
- [ ] Present your offer and direct buyers to enroll or book.

OUTCOME

Opt-in captures leads → Trust Sequence builds credibility → Conversion Event closes at volume.

TRACK B — HIGH-TICKET GROWTH

Inbound Conversion Track

Best for high-ticket consulting, retainers, or agency engagements where each client represents significant revenue.

- [ ] Build your opt-in page connected to a short Conversion Event video.
- [ ] Drive qualified traffic through targeted outreach or paid channels.
- [ ] Direct qualified viewers to apply for a Strategy Session.
- [ ] Run the Inbound Conversion System to diagnose and close.

OUTCOME

Opt-in → Video builds trust and qualifies → Strategy session diagnoses → High-ticket engagement closes.

QUICK REFERENCE — FULL BUILD SEQUENCE

Phase 1 Audit → Ideal Client → Value Prop → Offer Architecture → Pricing Model

Phase 2 Lead Asset → Message Architecture → Trust Sequence → Channel Strategy

Phase 3 Conversion Mechanism → Inbound Conversion System (if high-ticket)

Track A Opt-in → Traffic → Conversion Event → Offer → Enroll

Track B Opt-in → VSL Video → Strategy Session Application → Close
